

Donald C. Brown entered the Marines Corps in August of 1987 and retired in September of 2007. During his time in the Marines, Don served as a

weather forecaster in various locations to include the Chemical Biological Incident Response Force (CBIRF). While active duty at CBIRF, Don learned Extraction and Decontamination techniques while providing weather forecasting and analysis pertinent to chem/bio defense operations. Don also participated in Operation Noble Eagle supporting the anthrax decontamination on the Hart Senate building. While in the military, Don gained much experience as a formal school instructor at the Joint Meteorological Analysis and Forecasting School where he served as a platform instructor and course superintendent for the Marine Weather

Observing Course. Upon retiring from the Marine Corps, Don developed curriculum at U.S. Customs and Border for their Automated Commercial Environment software. In December of 2007, Don rejoined CBIRF this time as a contractor. In 2016, Don joined Global 21 to continue working on the CBIRF contract where he participates in numerous training events including rope rescue certification, confined space, collapsed structure, and advanced DECON training. Don also supports curriculum review boards resulting in updating and re-writing course material. Don has performed duty as observer/controller on several training operations in New York City; Quantico, VA; Indian Head, MD as well as Guardian Centers, GA.
